

School Vision and Strategy

1349 IB School

- We promote holistic education, related to learning critical thinking, which should provide tools for understanding and ordering the world
- We teach independence and communication skills, as well as making the right educational and professional decisions
- It is our tradition to pass humanistic values on to young people as the most important heritage
- We teach young people to be sensitive and open to the needs of the suffering through voluntary work and various social activities
- Apart from teaching, it is important for us to shape social and patriotic attitudes, as well as a sense of belonging to a civic society
- We promote the spirit of tolerance and openness to the world and diversity of cultures
- We enable our students to develop on many levels and in various forms
- We intend to develop lifelong learners, who are independent and resourceful people, responsible both for themselves and others
- Our school is open to the needs of every student, also the dysfunctional one as we promote cooperation with specialists from outside the school environment
- We attach great importance to the law education of young people through participation in the meetings conducted by lawyers, not only at school, but also in court rooms and prisons.
